Assets Processed	Securely Sanitised	Physically Destroyed	No Data / Other

Customer Details	Processing Summary
Customer: Sample Customer Ltd	WTN Reference: WTN-SAMPLE-0002
Address: 123 Example Street, London, EC1A 1AA	Report Date: 14 June 2026
Site: Colocation Hall 2, Rack A14–A17	Tagged Assets: 24

79.2%	20.8%	306 kg	3,940
REUSE RATE	RECYCLE RATE	TOTAL WEIGHT	KG CO ₂ E AVOIDED

CO₂e avoided through reuse & recycling vs. landfill (UK DEFRA/EPA factors). Weights from manufacturer specifications.

KEY STATS BY ASSET TYPE

ASSET TYPE	QUANTITY	REUSED	RECYCLED / DESTROYED	WEIGHT (KG)
Rack Servers	8	8	–	176.0
Storage Arrays & Shelves	3	2	1	96.0
Hard Drives & SSDs	9	6	3	6.3
Networking	3	2	1	27.0
GPU / Accelerators	1	1	–	0.9
Total	24	19	5	306.2

DATA SANITISATION BY STANDARD

7 NIST 800-88 Purge – SAS/SATA Sanitize | 4 NIST 800-88 Purge – NVMe Crypto Erase | 4 NIST 800-88 Clear | 3 NIST 800-88 Purge – NVMe Block Erase | 3 NIST 800-88 Destroy – Punch | 2 AATF Recycling | 1 Firmware / VBIOS Reset

Standards read from the WipeIT/Blancco erasure certificate for each drive. Physical destruction performed per NIST 800-88 Rev.1 Destroy using an industrial drive punch.

Compliance & Certification

All assets processed in accordance with:

- UK Data Protection Act 2018 & GDPR
- WEEE Regulations 2013
- Environmental Protection Act 1990
- NIST 800-88 Media Sanitization

PYCO RENEW LTD · Waste Carrier Licence CBDU607333

Important Information

Liability: This report reflects condition and identification available at time of processing. Items without visible serials or that do not power on are processed as data-bearing WEEE and physically destroyed.

Physical Destruction: Drives are punched through the platters per NIST 800-88 Rev.1 Destroy; residue is segregated for WEEE recycling.

Confidentiality: Store this report and certificates securely.
